

# OBERSTÜTZ ORGELBAU

## *Organ Casework*

HANDCRAFTED CASEWORK  
AND PIPE FACADES FOR  
DIGITAL PIPE ORGANS

## To our valued customer;

Our mission at Oberstütz Orgelbau is to bring the majestic visual presence of pipes and casework to the already majestic *aural* presence of your digital pipe organ. From simple flats of pipes with grille cloth to gilded-cherub crowned towers, our goal is to help you create a sculptural and architectural focal point to enhance the musical authority of your instrument.

Presented in this *Casework Brochure* is a representation of our casework capabilities along with general price ranges for 2015. Prices are given in ranges as there are many variables: wood species, finishes, ornamentation, speaker accommodations along with installation and mounting considerations.

We encourage you to think in modular terms, that is, visualize your project in units of pipe flats and towers. Our facades are built as separate modules (flats/towers) to facilitate shipping and installation. A very effective case can be created with 3 modules.

We also include, for your inspiration, images of great pipe organs from around the world. This section is intended as a stylistic frame of reference for exploring your architectural preferences.

We welcome your inquiries and look forward to working with you. Let us create drawings (pdf) for you; we need only general ideas of what your stylistic preferences are, some dimensions and your financial parameters. If you can imagine it, we can build it.

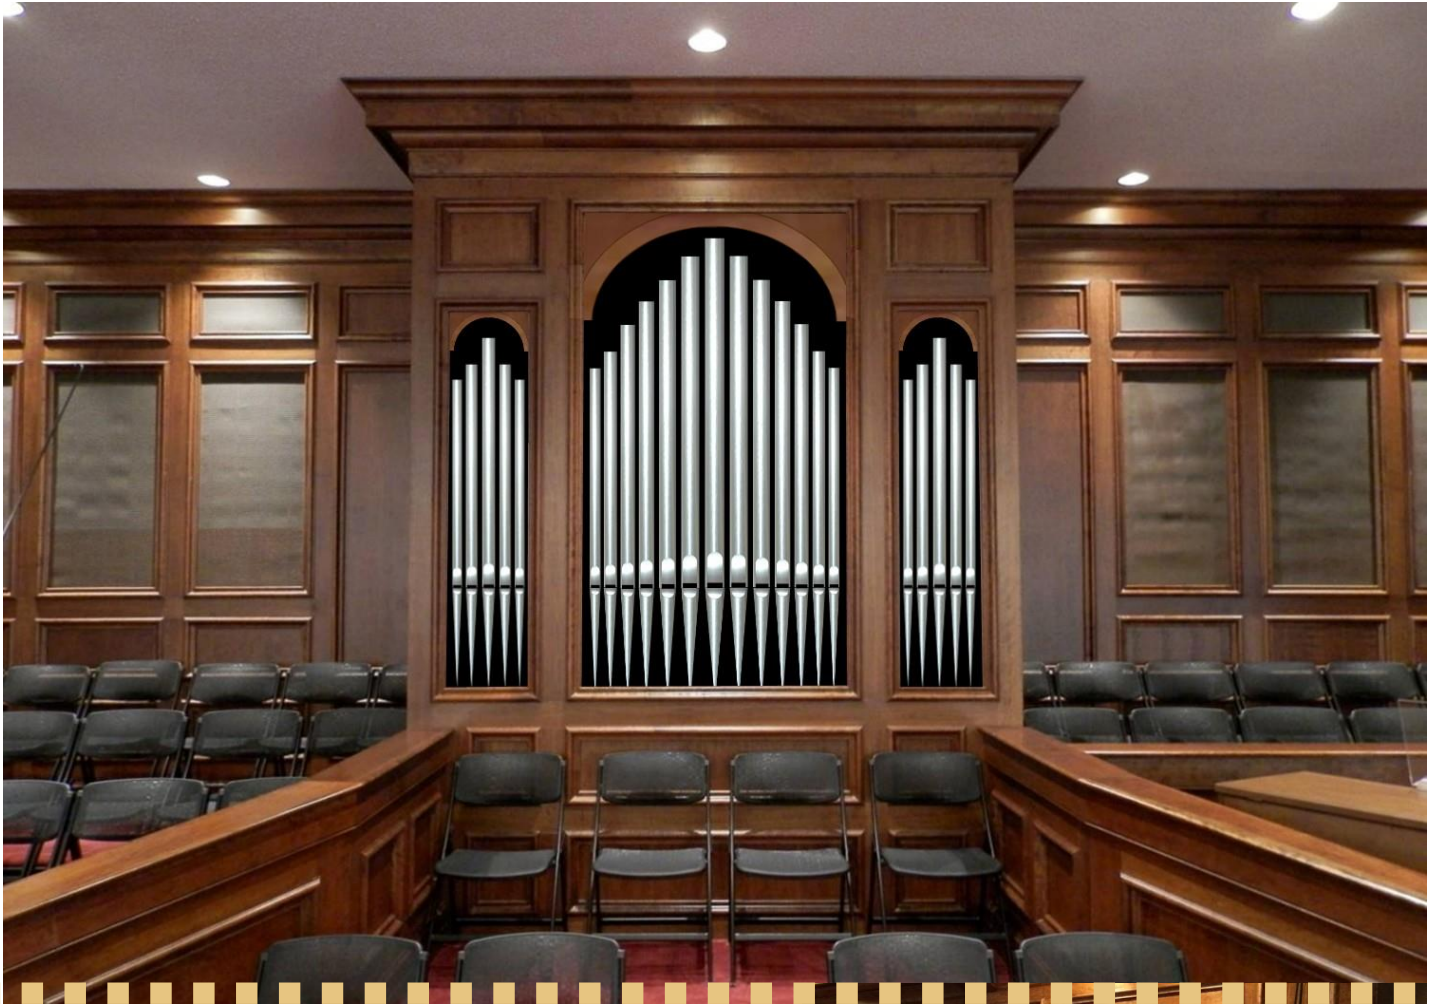

Eugene Stutzman, *President and Creative Director*  
Oberstütz Orgelbau Sarasota, Florida

Price Range: \$25,000 to \$55,000

# Historical Casework

## Inspiration...

When envisioning a facade project for your venue, allow your imagination to soar. Shown above are some truly inspiring examples of exuberantly painted doors, pipes and casework, all of which are distinct possibilities to be translated into low-relief, modular facades. Pipes and casework can also be aged and distressed to take on the wonderful character of 15<sup>th</sup> century organs. We contract with muralist / faux painter Skip Dydra and other craft persons whose talents exponentially expand your creative options.
